**For immediate release** – Team Eagle Ltd., a World Leading Airfield Supplier, and Nilfisk-Advance, a World Leading Manufacturer of professional cleaning equipment, have teamed up to form a sales distribution partnership for representing the Cyclone products to the North American airfield market.

“The opportunity to represent the Cyclone technology at airfields is a perfect fit for our expanding safe surfaces division” cites Trevor Winn, Team Eagle’s CFO. “We are always looking out for effective technology that can solve airfield challenges with practical solutions. What Cyclone has developed is a system to remove rubber and paint from runways along with specialized cleaning equipment for gates, bridges and parking areas. We feel that this is the best technology on the market for removing rubber and paint on airfields and is environmentally friendly where there is no requirement for messy chemicals, nor any need for complex and noisy vacuum recovery systems.”

Team Eagle is a World Leading Supplier of airfield solutions that target airfield management, maintenance and operations. We sell and support industry best snow and ice control equipment and develop customized software to assist with incursion management, DEVS navigation, SMS, and runway condition reporting.
