ØVERAASEN
SNOWREMOVAL SYSTEMS

The ØVERAASEN UTV 300/UTV 380 Performance Line is a flexible unit snow blower designed for use on airports and roads. Based on the dual stage system, which consist of the slowly rotating horizontal auger and the fast turning impeller, the snow blower is capable of clearing all types of snow, even wet, hard packed or icy snow. The UTV 300/UTV 380 Performance Line has mechanical driveline and both the auger and the impeller are protected against damages by mechanical shear-pins. The snowblower is perfectly suited used in combination with 14-18 tons front end loaders.
